Peace, War & Conflict

Arms Trade

Adoption of the International Code of Conduct on Arms Transfers

(This International Code of Conduct would govern all arms transfers, including conventional weapons and munitions, military and security training, and sensitive military and dual-use technologies. The Code stipulates that any country wishing to purchase arms must meet certain criteria, including the promotion of democracy, the protection of human rights, and transparency in military spending. It would also prohibit arms sales to nations that support terrorism and to states that are engaged in aggression against other nations or peoples.)

Only allow exports to countries who are in:

- Compliance with international human rights standards
- Compliance with international humanitarian law
- Respect for democratic rights
- Respect for international arms embargoes and military sanctions
- Participation in the United Nations Register of Conventional Arms
- Commitment to promote regional peace, security and stability
- Opposition to terrorism
- Promotion of human development
  (International Code of Conduct on Arms Transfers)

Adoption of the Framework Convention on International Arms Transfers

(The Framework Convention is proposed as a legally binding agreement setting out core principles and mechanisms relating to international transfers of arms. The Convention would require States to adopt and implement national mechanisms for the explicit authorisation of international transfers of arms. The Convention would ban the transfer of arms that could be used to seriously violate internationally established standards of human rights, humanitarian law and non-aggression. It would also require exporting states to avoid the sale of weapons that could have an adverse impact on sustainable development or regional peace and security, would facilitate the commission of violent crimes, or could be easily diverted.)
End government subsidies and support for arms exports;
End exports to oppressive regimes;
End exports to countries involved in an armed conflict or region of tension;
End exports to countries whose social welfare is threatened by military spending;
Support measures which will regulate and reduce the arms trade and lead to it eventually end. (CAAT – Campaign to End Arms Trade, UK)
